EXPERIENCE

Full Stack Developer

Bringway Solutions

July 2026 – Present

Bengaluru, Karnataka

- Designed an Inventory Management System after finding the company had no reliable way to track who held an asset or its current status.
- Simplified asset handovers and maintenance by bringing assignments, returns, repairs, and history into one centralized system.

Freelance Full Stack Developer

Self-Employed

April 2026 – Present

- Worked on and off as a freelance developer for clients primarily across the US and Europe, developing proof-of-concepts and MVPs and integrating third-party APIs to meet client requirements.

Software Development Engineer Intern

Bock AI

Jan 2026 – June 2026

Bengaluru, Karnataka

- Replaced email-based APK sharing with an internal distribution platform using Node.js, Express, PostgreSQL, adopted across the company.
- Redesigned file delivery around time-limited AWS S3 presigned URLs after discovering Android blocks apps from installing other APKs directly.
- Built ownership-verification middleware so users could only edit or delete their own uploaded apps.

PROJECTS

Medicate – AI Healthcare Platform | [GitHub](#) | [Live](#)

- Built an AI healthcare prototype platform for an Bio Medical startup with a login-gated chatbot for symptom queries, alongside appointment booking and pharmacy lookup.
- Managed LLM context windows to control token usage, capping and trimming chat history sent to Gemini on each request.

TECHNICAL SKILLS

Languages & Frameworks: Python, JavaScript, TypeScript, Node.js, Express.js, React, Flask

Cloud & Backend: AWS S3, Cloudinary, REST APIs, JWT, CORS, Vercel, Render, Postman, Gunicorn
